Experienced support lead, strongest on tools and process. I like to turn repeated questions into queues, rules and templates that let a team answer faster.

- Customer Support Team Lead, Cobalt Travel Gear, 2020 to present
 - Lead a team of eight agents on a ticketing platform that I configured: eleven queues, priority rules, automatic routing by language and product, and 85 saved replies.
 - Wrote the triage rules and the escalation path to the shipping and payments teams; tickets reach the right owner at the first hop 94 percent of the time.
 - Connected the platform to the order system so agents see the order, tracking and refund history beside every ticket; handling time fell by 30 percent.
 - Handle customer replies for the harder cases (late parcels, damaged goods). I follow the team script and ask the director for guidance on angry customers.
 - Run weekly stand-ups and assign work; I give feedback to the agents but the director runs the formal reviews and promotions.
 - Pull weekly numbers from the platform reports (volume, first response, backlog) and share them in a slide for the team.
- Support Agent, Cobalt Travel Gear, 2017 to 2020
 - Answered email and chat, tagged tickets and wrote 30 help articles.

Skills: ticketing platform administration, automation rules, saved replies, order system integration, spreadsheets

Education: BSc Management, Koruma University, 2017
